Mariel Kim R. Vaflor

I am an empathetic and diligent individual who's proficient in critical thinking, communication, and problem-solving. I have a positive and can-do attitude toward all of the duties and responsibilities that are given to me and have the capacity to learn quickly under any circumstances. Along with that, I am also someone who is adept and capable of managing tasks and time. I am a versatile individual who believes that all genuine learning comes through experience, as I see challenges as opportunities to nurture my existing skills and knowledge to be a better individual. With that, I want to be part of an organization that provides a healthy environment where I can make the most of my potential, improve my existing skills, and learn new knowledge that I can use in the future.
